

Promax CanReset

Listening to the problems that remanufacturers face on a daily basis has led to another addition to the Promax Imaging product range. The Promax CanReset will reset Canon PGI-5 and CLI-8 cartridges in less than five seconds. Unlike previous resetter's of this type, the CanReset is inexpensive and works independently of a printer.

Simply connect the unit to a power supply, insert the cartridge and wait for the cartridges own red LED light to glow. The whole process takes less than 5 seconds!

- Low Cost
- Ultra Efficient
- Quick and Easy
- Doesn't Require a Printer

The CanReset is available in two types. One type works from a USB power source whilst the other works with mains electricity.

CanReset USB £30

CanReset MAINS £40
